Projects

Personal Portfolio Website   Technologies used- *HTML, CSS, Javascript*
Created an interactive personal portfolio website to showcase about my self, my technical projects, skills, and achievements

Personal Expense Tracker   Technologies used: *Python, SQL*
Built a personal finance tool that tracks income and expenses. Users can categorise transactions and view summaries of their spending habits over time.

Personalised Dashboard   Technologies used: *HTML, CSS, Javascript, APIs*
Created a fully personalised website for myself that displays widgets such as weather, time, location and current stock market and crypto trends. Planning to add a voice assistant in the future

Social Media Dashboard   Technologies used: *HTML, CSS, Javascript, APIs*
Created a fully personalised website for myself that displays widgets such as weather, time, location and current stock market and crypto trends. Planning to add a voice assistant in the future
